

## ABSTRACT

The present invention automatically and continuously packs women's sanitary products, paper diapers, and the like in a sealed manner and is  
5 installed in toilets of hotels, public toilets, and the like used by general public.

When a trash is put in, film pull-out rollers (50), (60) are rotated by a motor (70) and films (31), (41) are pulled out from film feed rollers (30), (40). When passing between film pull-out rollers (50), (60), the trash is sealingly packed between the two films (31), (41). Therefore, since the trash can be  
10 automatically packed in a sealed manner and a clean state is maintained, the present invention is suitable for installation in toilets of hotels, public toilets, and the like used by general public.
